

Does cloning information improve movement?

20 dimensions · 100,000-evaluation cap · 10 seeds · Wave: 128 walkers, 5 elites

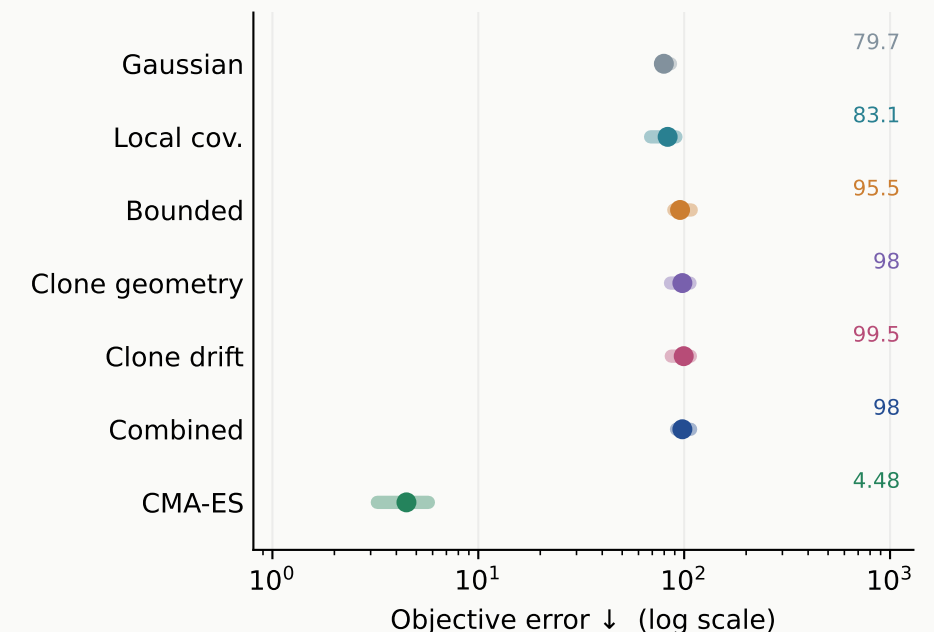

Quadratic bowl

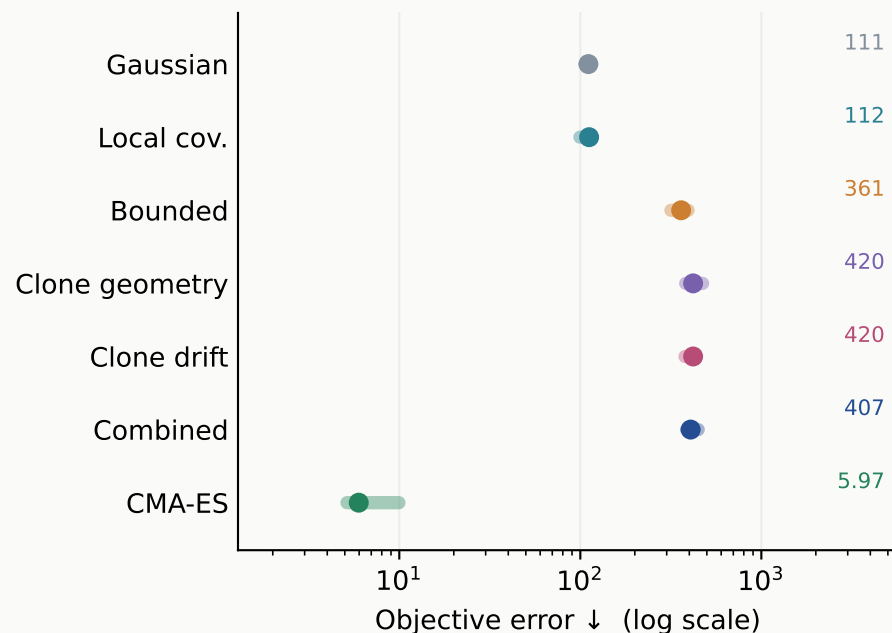

Rotated ellipsoid

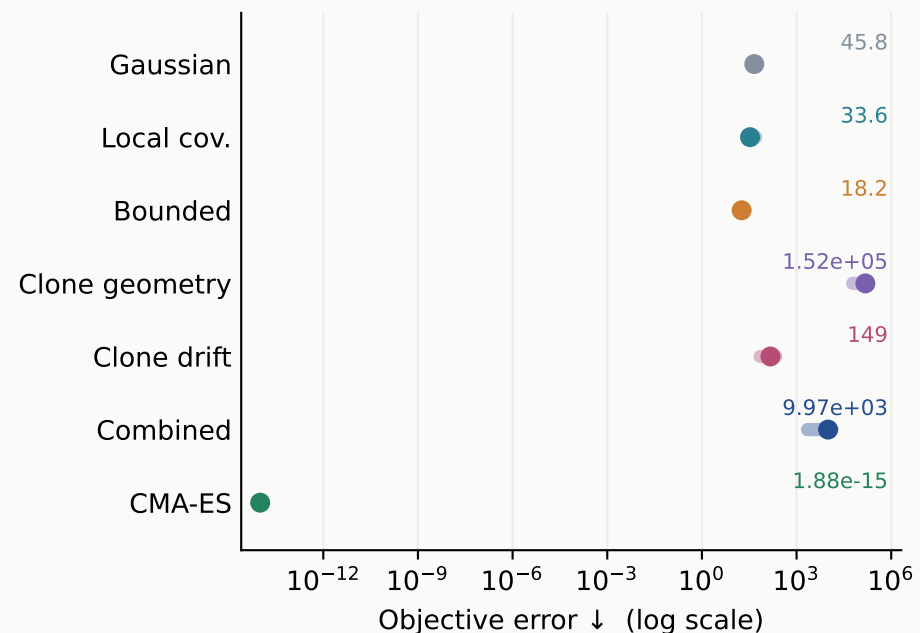

Rastrigin

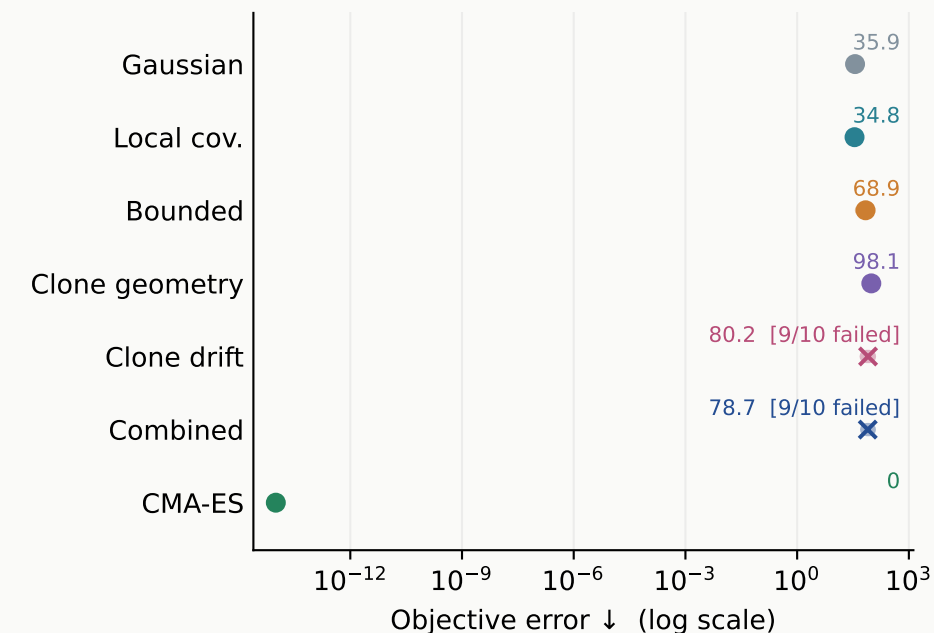

Rotated Rastrigin

Rosenbrock

Boundary optimum

Dots: medians · thick intervals: middle 50% · crosses: groups with execution errors (last best value retained)

Errors below 10^{-14} are drawn at 10^{-14} . CMA-ES uses its own population and restarts; fractal automatic restarts are disabled.
